

## **Health & Safety Report for APCM 2021.**

The main thrust of health & safety has been focused over the last 12 months on risk assessment reports required for the opening the church for private prayer & more recently, weekly communion services.

My thanks to Stephen Hayes for his help in helping to set up the church so that we could implement the plan & for any training necessary for those folk who kindly agreed to officiate at either private prayer sessions and/or communion services.

Other necessary checks:-

- Condition of boundary fencing
- Emergency Lighting system
- Conditions of graves, pathways etc
- Annual check of Fire Extinguishers

have continued since the last APCM, in accordance with the Government Covid Guidelines applicable at the time the check was undertaken.

The PCC has approved a Health & Safety policy as presented, together with associated Risk Assessment documents

Roger Liscoe  
Health & Safety Officer
